

ARTICLE 38(6) CSDR DISCLOSURE: ENGLISH LAW¹

1. Introduction

The purpose of this document is to disclose the levels of protection associated with the different levels of segregation that we provide in respect of securities that we hold directly for clients with Central Securities Depositories (*CSDs*), within the EEA including a description of the main legal implications of the respective levels of segregation offered and information on the insolvency law applicable. This disclosure is required under Article 38(6) of the Central Securities Depositories Regulation (*CSDR*) in relation to *CSDs* in the EEA under *CSDR*. The *CSDs* of which we are a direct participant (see glossary below) have their own disclosure obligations and we include links to those disclosures in this document.

This document is not intended to constitute legal or other advice and should not be relied upon as such. Clients should seek their own legal advice if they require any guidance on the matters discussed in this document.

2. Background

In our own books and records, we record each client's individual entitlement to securities that we hold for that client in a separate client account. We also open accounts with *CSDs* in our own name in which we hold clients' securities. We currently make two types of accounts with *CSDs* available to clients: Individual Client Segregated Accounts (*ISAs*) and Omnibus Client Segregated Accounts (*OSAs*).

An *ISA* is used to hold the securities of a single client and therefore the client's securities are held separately from the securities of other clients and our own proprietary securities.

An *OSA* is used to hold the securities of a number of clients on a collective basis. However, we do not hold our own proprietary securities in *OSAs*.

Barclays normal practice will be to utilize *OSA* account structures. Should you wish to use an *ISA*, please contact your Relationship Manager or usual Barclays contact. Please note that use of an *ISA* may change Barclays fees and expenses incurred in the performance of its obligations under the Agreement. Barclays is obligated by *CSDR* to offer *ISAs* on reasonable commercial terms and therefore permitted to charge such reasonable increases to our usual fees and expenses to clients wishing to use *ISAs*.

¹ This note discusses in the main the English law position as Barclays Bank PLC is incorporated in the UK and regulated there. However, where relevant we will also comment on the law in the Crown Dependency of Jersey, as Barclays Bank PLC (Jersey Branch) is a direct member of Clearstream Banking Luxembourg and therefore within scope of *CSDR*.

3. Main legal implications of levels of segregation

Insolvency

Clients' legal entitlement to the securities that we hold for them directly with CSDs would not be affected by our insolvency, whether those securities were held in ISAs or OSAs.

The distribution of the securities in practice on an insolvency would depend on a number of factors, the most relevant of which are discussed below.

Application of English insolvency law

Were we to become insolvent, we would expect that insolvency proceedings would take place in England and be governed by English insolvency law.

Under English insolvency law, securities that we held on behalf of clients would not form part of our estate on insolvency for distribution to creditors, provided that they remained the property of the clients². Rather, they would be deliverable to clients in accordance with each client's proprietary interests in the securities.

As a result, it would not be necessary for clients to make a claim in our insolvency as a general unsecured creditor in respect of those securities. Securities that we held on behalf of clients would also not be subject to any bail-in process (see glossary), which may be applied to us if we were to become subject to resolution proceedings (see glossary).

Accordingly, where we hold securities in custody for clients and those securities are considered the property of those clients rather than our own property, they should be protected on our insolvency or resolution. This applies whether the securities are held in an OSA or an ISA.

Application of Jersey insolvency law

However, were we to become insolvent, it is possible that some insolvency proceedings could take place in Jersey and be governed by Jersey insolvency law. Similarly, under Jersey insolvency law, securities that we held on behalf of clients would not form part of our estate on insolvency for distribution to creditors, provided that they remained the property of the clients (see footnote 2 below also). Securities that we held on behalf of clients would also not be subject to any bail-in process (see glossary). Therefore, comparable to the English position noted above, where we hold securities in custody for clients and those securities are considered the property of those clients rather than our own property, they should be protected on our insolvency or resolution

² When a client has sold, transferred or otherwise disposed of their legal entitlement to securities that we hold for them (for example, under a right to use or title transfer collateral arrangement), the securities will no longer be the property of the client.

Furthermore, it is possible for English insolvency procedures and officeholders to be recognised in Jersey (and vice versa). Therefore, we would expect coordination between the jurisdictions in the event of our insolvency.

Nature of clients' interests

Although our clients' securities are registered in our name at the relevant CSD, we hold them on behalf of our clients, who are considered as a matter of law to have a beneficial proprietary interest in those securities. This is in addition to any contractual right a client may have against us to have the securities delivered to them.

This applies both in the case of ISAs and OSAs. However, the nature of clients' interests in ISAs and OSAs is different. In relation to an ISA, each client is beneficially entitled to all of the securities held in the ISA. In the case of an OSA, as the securities are held collectively in a single account, each client is normally considered to have a beneficial interest in all of the securities in the account proportionate to its holding of securities.

Our books and records constitute evidence of our clients' beneficial interests in the securities. The ability to rely on such evidence would be particularly important on insolvency. In the case of either an ISA or an OSA, an insolvency practitioner may require a full reconciliation of the books and records in respect of all securities accounts prior to the release of any securities from those accounts.

In addition to being regulated by the Prudential Regulation Authority and the Financial Conduct Authority in the UK, in Jersey, we are regulated by the Jersey Financial Services Commission and also subject to the Financial Services (Investment Business (Client Assets)) (Jersey) Order 2001 ("**Client Asset Order**"), which contains detailed requirements as to the maintenance of accurate books and records and the reconciliation of those records against those of the CSDs with which accounts are held. We are also subject to regular audits in respect of our compliance with those rules.

Shortfalls

If there were a shortfall between the number of securities that we are obliged to deliver to clients and the number of securities that we hold on their behalf in either an ISA or an OSA, this could result in fewer securities than clients are entitled to being returned to them on our insolvency. The way in which a shortfall could arise would be different as between ISAs and OSAs (see further below).

How a shortfall may arise

A shortfall could arise for a number of reasons including as a result of administrative error, intraday movements or counterparty default following the exercise of rights of reuse. If agreed with the relevant clients, a shortfall may also arise in the case of an OSA as a result of securities belonging to one client being used by another client for intra-day settlement purposes.

Where we have been requested to settle a transaction for a client and that client has insufficient securities held with us to carry out that settlement, we generally have two options:

- (i) in the case of both an ISA and an OSA, to only carry out the settlement once the client has delivered to us the securities needed to meet the settlement obligation; or
- (ii) in the case of an OSA, to make use of other securities held in that account to carry out settlement subject to an obligation on the part of the relevant client to make good that shortfall and subject to any relevant client consents required.

Where option (ii) is used, this increases the risks to clients holding securities in the OSA as it makes it more likely that a shortfall in the account could arise as a result of the relevant client failing to meet its obligation to reimburse the OSA for the securities used.

In the case of an ISA, only option (i) above would be available, which would prevent the use of securities in that account for other clients and therefore any resulting shortfall. However, it also increases the risk of settlement failure which in turn may incur additional buy-in costs or penalties and/or may delay settlement as we would be unable to settle where there are insufficient securities in the account.

Where clients' securities are held in an OSA, we will use option (ii) in accordance with agreed contractual terms.

Treatment of a shortfall

In the case of an ISA, the whole of any shortfall on that ISA would be attributable to the client for whom the account is held and would not be shared with other clients for whom we hold securities. Similarly, the client would not be exposed to a shortfall on an account held for another client or clients.

In the case of an OSA, the shortfall would be shared among the clients with an interest in the securities held in the OSA (see further below). Therefore, a client may be exposed to a shortfall even where securities have been lost in circumstances which are completely unrelated to that client.

The risk of a shortfall arising is, however, mitigated as a result of our obligation under the Client Asset Order in certain situations to set aside our own cash or securities to cover shortfalls identified during the process of reconciling our records with those of the CSDs with which securities are held.

If a shortfall arose and was not covered in accordance with the Client Asset Order, clients may have a claim against us for any loss suffered. If we were to become insolvent prior to covering a shortfall, clients would rank as general unsecured creditors for any amounts owing to them in connection with such a claim. Clients would therefore be exposed to the risks of our insolvency, including the risk that they may not be able to recover all or part of any amounts claimed.

In these circumstances, clients could be exposed to the risk of loss on our insolvency. If securities were held in an ISA, the entire loss would be borne by the client for whom the relevant account

was held. If securities were held in an OSA, the loss would be allocated between the clients with an interest in that account.

In order to calculate clients' shares of any shortfall in respect of an OSA, each client's entitlement to securities held within that account would need to be established as a matter of law and fact based on our books and records. Any shortfall in a particular security held in an OSA would then be allocated among all clients with an interest in that security in the account. It is likely that this allocation would be made rateably between clients with an interest in that security in the OSA, although arguments could be made that in certain circumstances a shortfall in a particular security in an OSA should be attributed to a particular client or clients. It may therefore be a time consuming process to confirm each client's entitlement. This could give rise to delays in returning securities and initial uncertainty for a client as to its actual entitlement on an insolvency. Ascertaining clients' entitlements could also give rise to the expense of litigation, which could be paid out of clients' securities.

Security interests

Security interest granted to third party

Security interests granted over clients' securities could have a different impact in the case of ISAs and OSAs.

Where a client purported to grant a security interest over its interest in securities held in an OSA and the security interest was asserted against the CSD with which the account was held, there could be a delay in the return of securities to all clients holding securities in the relevant account, including those clients who had not granted a security interest, and a possible shortfall in the account. However, in practice, we would expect that the beneficiary of a security interest over a client's securities would perfect its security by notifying us rather than the relevant CSD and would seek to enforce the security against us rather than against such CSD, with which it had no relationship. We would also expect CSDs to refuse to recognise a claim asserted by anyone other than ourselves as account holder.

Security interest granted to CSD

Where the CSD benefits from a security interest over securities held for a client, there could be a delay in the return of securities to a client (and a possible shortfall) in the event that we failed to satisfy our obligations to the CSD and the security interest was enforced. This applies whether the securities are held in an ISA or an OSA. However, in practice, we would expect that a CSD would first seek recourse to any securities held in our own proprietary accounts to satisfy our obligations and only then make use of securities in client accounts. We would also expect a CSD to enforce its security rateably across client accounts held with it.

Furthermore, the Client Asset Order restricts the situations in which we may grant a security interest over securities held in a client account.

Security over Jersey-based assets

Please note that any security granted over assets situated in Jersey would need to comply with relevant Jersey laws such as the Security Interests (Jersey) Law 2012 or 1983 (as applicable). We would expect to be notified if such security is granted by any of our clients and if the Jersey party would seek to enforce the security against us rather than against or by the relevant CSD as above.

GLOSSARY

Bail-in refers to the process under the Banking Act 2009 or the Bank (Recovery and Resolution) (Jersey) Law 2017 (not yet in force) or contractual bail-in (as applicable) applicable to failing UK or Jersey banks and investment firms under which the firm's liabilities to clients may be modified, for example by being written down or converted into equity.

Central Securities Depository or ***CSD*** is an entity which records legal entitlements to dematerialised securities and operates a system for the settlement of transactions in those securities.

Central Securities Depositories Regulation or ***CSDR*** refers to EU Regulation 909/2014 which sets out rules applicable to CSDs and their participants.

Direct participant means an entity that holds securities in an account with a CSD and is responsible for settling transactions in securities that take place within a CSD. A direct participant should be distinguished from an indirect participant, which is an entity, such as a global custodian, which appoints a direct participant to hold securities for it with a CSD.

EEA means the European Economic Area

Resolution proceedings are proceedings for the resolution of failing UK banks and investment firms under the Banking Act 2009 or the Bank (Recovery and Resolution) (Jersey) Law 2017 (not yet in force) or contractual bail-in (as applicable).
